X	x	equis	/ks/, /s/	ks, s	<i>taxi</i>	taxi
Y	y	ye, (formerly known as "i griega")	/i/, /j/ /j/, /k/	ee, y	<i>hoy</i> <i>ya</i>	today already
Z	z	zeta, ceta	/s/, /θ/	s, th*	<i>zorro</i>	fox

* Letters c (ce, ci) and z are pronounced as "th" in Castilian Spanish

SPANISH TABLE

Spanish Alphabet

Digraphs						
Uppercase	Lowercase	Name	Phoneme (IPA)	Mangonetics	Examples	
Ch	ch	<i>che</i>	/tʃ/	ch	charco	puddle
Ll	ll	<i>elle</i>	/j/, /ʎ/	y	llave	key
--	rr	<i>erre</i>	/r/	rr	arroz	rice

Digraphs are not part of the Spanish alphabet. They are two letters that represent one sound. *Ll* and *rr* overlap with *y* and *r*, respectively.

Rr is not usually used in upper case because it's only used between vowels. Words that begin with a "trill" (aka rolled *r*) are represented with a single *r*.
